Mathematician & AI Tinkerer

I am an AI Scientist at i14 in Melbourne.

From March 2022 - February 2026 I was an Assistant Professor at the Yau Mathematical Sciences Center (YMSC), at Tsinghua University in Beijing.

Prior to this, I was a postdoc at Texas A&M University working with Guoliang Yu. I received my Ph.D. in December 2018 from the University of Adelaide under the direction of Mathai Varghese and Hang Wang.

I am interested in index theory, K-theory, and their connections to geometry, topology, and group theory.
